CardioAI: Complete UML Deployment Diagram

Physical and Computational Deployment Architecture for Explainable Heart Disease Prediction System (UML 2.5 Metamodel)

UML Deployment Diagram Notation Reference (GeeksForGeeks Standard)

- **Node (3D Box)** — Physical or computational execution resource
- **Component** — Modular, reusable unit of software functionality
- **Artifact (Folded Sheet)** — Physical file, script, model weights, or database
- **Interface (Lollipop)** — Contract specifying provided/required operations (+)
- **Solid Line: Communication Link** — Network protocol (HTTPS, TCP/IP, Ports) connecting devices
- **Dashed Arrow: Dependency** — Shows «manifest», «use», or «deploy» association
