Use Case Template

CardioAI - Heart Disease Prediction System

1. Use Case Title	Download PDF Diagnostic Report
2. Abbreviated Title	Download PDF Report
3. Use Case Id	UC-05
4. Actors	Clinician (Primary), Patient (Stakeholder)
5. Description	The Clinician generates and downloads a comprehensive PDF report containing patient demographics, prediction results, XAI visualizations, and a clinical narrative summary for the patient's medical record.
5.1. Pre Conditions	1. A prediction (UC-03) and XAI analysis (UC-04) have been completed. 2. PDF generation library is available.
5.2. Task Sequence	1. Clinician clicks 'Download Report' on the Results Dashboard. 2. System invokes UC-16: Generate Clinical Narrative Report. 3. System compiles patient data, prediction, XAI charts, and narrative. 4. System generates the formatted PDF document. 5. Browser triggers a file download to the Clinician's device.
5.3. Post Conditions	1. A formatted PDF diagnostic report is downloaded. 2. Report can be shared with the Patient or added to medical records.
6. Modification History	Date: September 11, 2026
7. Author	Dhruv Singla (1024170434), Srishti (1024170451)
